

Jey Kazi

PROFILE

I'm an award nominated sound designer and avid gamer based in Manchester UK. I love my job and feel privileged to be able to work in an industry creating art with talented peers for people to enjoy. I'm passionate about all aspects of game development and game audio. I've spent the past few years working on indie titles, both PC and Console. From small 2 man indie teams, right up to large independent studios. My approach to game audio is technical but also creative. I'm comfortable working with middleware, scripting and being hands on with game engines. I think it's important to have a holistic approach to game development where feedback and teamwork are paramount.

SKILLS

FMOD	WWise	Unity	Unreal	Reaper	Pro Tools
